Field Experience #2
Interesting points

/ Smart kid, but does not want to do the work, can be a disruption. What do you do? Put him in a more challenging class. Give him more challenging problems, differentiation, multiple ways to teach the same topic.

/ Students are making songs about math vocab/topics

/ SAT questions, collegeboard.com has a question each day and other stuff.

/ When do we need this stuff.
Activities (Where do we get them):
Intermath, NCTM, Mathcounts, Teachervision.com, Dr. Math forum
(http://mathforum.org/library/drmath/drmath.high.html), google math terms

Some teachers are just lecturing and then walking around and helping students.
